

# SnI e-archive

# ELECTRONIC ARCHIVING SOLUTION

e-arşiv

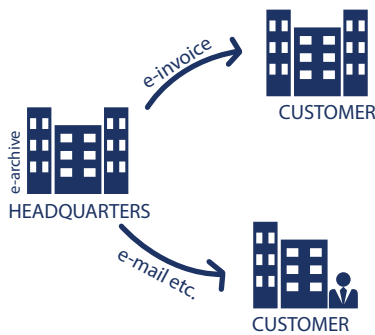

- Easy to Implement
- Easy to Use
- Easy to Maintain

Ready for e-Transformation®?

- Other products
- e-invoice
- e-ledger
- e-waybill

Invoices that are obliged to be created, retained and submitted in a paper-based environment in accordance with Tax Procedure Law, are enabled by e-archive to be regulated electronically and to retain and submit the second copy in an electronic environment.

By SnI e-archiving solution this will not only eliminate the requirement to stock second/blue copies of invoices in paper but also enable companies to send invoices by e-mail regardless of receiving party's invoicing system.

## ADVANTAGES

- Space saver :** Eliminates entirely the necessity of stocking copies.
  - Time saver :** Customer gets notified via e-mail by the time the invoice is created.
  - Cost advantages :** Eliminates the costs of paper, shipment and error correction.
  - Data Security:** Data security is provided via e-stamp and e-archive. Safer than paper stocks.
  - Data accessibility:** Allows swift accessibility to data in an electronic environment.
- Applications that have been developed with globally recognized open-source ABAP codes enable companies to keep the power in their hands and eliminate the dependency on suppliers.
- SnI's advantageous licensing policies eliminate the crucial cost items for holdings and corporations.

- 1- Checking e-invoices :** Automatically done by the system whether the customer is an e-invoicing user or not.
- 2- Transmitting e-invoices (e-mail etc.):** Invoices are sent to non e-invoice users via e-mail.
- 3- Signing (e-stamp):** Invoices within the scope of e-archiving are electronically signed.
- 4- Archiving (e-archive):** Invoices replacing the second copy are converted into a suitable format and electronically archived.

**Are you running SAP ERP?**

SnI e-government products enable you to manage all processes on SAP without requirement for any additional software and/or hardware.

## WHAT OUR CLIENTS SAY...

“While looking for alternative solutions in the market, our aim is to select the most comprehensive opencode applications with a high quality/cost ratio. SNI is the correct decision not only regarding the implementation period but also its seamless and continuous support services. Solutions are unique with their smartness and simplicity.”

Fahrettin UÇAR  
Country Controller, SUN Chemical

“We had no solid information on companies in Turkey prior to the SAP process as we were receiving all the necessary support from Italy. Therefore, we kept in touch with almost all the companies offering e-solutions before we chose our partner. SNI has guaranteed a simple but an effective solution where no PI module is required. During the implementation period we have received continuous and ceaseless support and keep on receiving it for the problems result from GIB. SNI is simply the true partner to us...”

Sühan ALTIN  
IT Manager, RECORDATI

“We have examined all alternative solutions in the market just like every company that is obliged to launch e-invoicing. Our aim was to choose the very best solution in accordance with quality/cost ratio. Right after the first demo, we were convinced that SNI's simple and smart open-code application was the most suitable for us. During the implementation period, we were incredibly pleased with SNI's seamless services and efforts. Moreover, our team started managing and developing new requests. SNI has become our true partner in this process...”

Güngör BİNGÜL  
IT Manager, KOROZO

## ABOUT SNI

Established in 2004 in Istanbul and registered as SAP AG Global Application Development Partner, SNI has played an influential role in providing SAP services and solutions. SNI operates globally in many countries with over 5,000 trusted contractors and 50 employees.

Change is the one constant with government financial regulations. SNI, the leader in Turkey electronic invoicing among companies running SAP, provides solutions and services that reduce the risk and cost of maintaining compliance across the region for the world's largest companies including Adidas, Deloitte, Korozo, MTU, Schneider, Merck, Tefal etc.

SNI offers e-invoice, e-ledger, e-archive and e-waybill solutions as well as other products that meet legal requirements.

SNI products are adoptable to companies existing infrastructure, and this enables to implement without requiring any additional investment on hardware and/or software. For the companies using SAP ERP, SNI applications are modularly adoptable to existing SAP system. This gives companies both ease-of-use and chance for cost saving while meeting legal mandatory requirements.
